LEARNING TO READ.

Infidels Up Against It.

The old infidels used to declare that there was no learning in the olden time, and if you read books on infidelity, written 200 or 150 years ago, will find that they decried the idoa that neonle could be as it was said in the Bible, as there were no letters in those days. But not quite a hundred years ago, there was up in Egypt, a stone, upon which were found three forms of writing—the Greek, the cuneiform of Coptic uage, and hieroglyphics of the Egyptions. As the learned men read the Greek, and began to translate the latters of the hieroglyphics, lo i they found that in a day the whole history of Egypt had been brought to light. Before that, all was darkness, nothing known about the old country of Egypt. anown amount ne old country of sgypt, but on that day, when those letters and hieroglyphic characters were translated from that stone, the Rosetta-stone, the times of kings, temples and worship were all made known, and every day since then has been a day of discovery of the wisdom and learning of that Court and people of that far-off time.—The Victory.

FUTURE LIFE.

What the Egyptians Thought of It.

Something of the Egyptian ideas of a future life may be gathered from the preliminary proceedings at a funeral. A sacred lake was constructed in, or near, every city or centre. The body of a deceased person was brought to the margin of the neorest sacred lake, where a number of judges had assombled to hear any evil accusations which might be brought against the decessed. On sufficient proof that any such accusations were just, burief and transport across the sacred lake were forbidden. Even kings had to go through this ordeal, and there are several instances on record where a public funeral was denied them. The refusal of honorable burial was not only a great disgrace but the foreshadowing of a terrible fate in Hades, shadowing of a terrible rate in races, The divine right of kings was, how-ever, so deeply ingrained that, pro-vided a sovereign's acts were not ingrantly bad, they were looked upon benefits to the nation, and his funeral wont forward with great pump and magnificence.—All the World.

JOHN MILTON, POET.

Could Not Escape the Eyes of God.

Six years were spent in retirement in Buckinghamshire, where he composed some of his earliest poetical Then he set out for a tour on the Continent, where he visited poor blind Galileo, a "prisoner to the Inquisition for thinking in astronomy otherwise than the priests thought."

He returned home morally and spiritually no worse a man than when he left. Said he, 'I take God to wit-ness that in all those places where so much license is permitted, I lived sound and untouched by all profligncy and vice, having this thought constantly before me, that, though I might escape the eyes of men, I co not escape the eyes of God."

This utterance is very characteristic. and indicates whot an exalted concentien he had of what life ought to be. He deliberately set himself as a poet to live a pure life that he might write the better.

He pledged himself to write to the

glory of God. To do "come work not to be raised from the heat of youth or the vapours of wine-like that which flows at waste from the pen of some vulgar amorist, or the trencher fury me rhyming parasite; but by de vont prayer to the Eternal Spirit, Who can enrich with all utterance and knowledge, and sends out His seraphim with the ballowed fire of His altar to purify the lips of whom He pleases .- The Field Officer.

DAVID'S SADNESS.

(Continued from last week.

bodily strength or nervous energy may have been completely exhausted. The responsibilities of his exalted position probably pressed heavily upon his kingly brow, and this would account largely for the dark experience of his soul. Our inner life very susceptible to our outward condition. A most trivial cause somehappiness and unhappiness. After any great mental or physical exertion the mind is left in a state of inaction and is tenderly sensitive to surrounding influences, and when think of the high pressure under which many of our lives in this "electric oge" are passed, it is a wonder that there are not more suffering among us from the intolerable depression that David bemoaned.

Let us, therefore, before lamonting the buoyancy of spirit of former days, and deciding that God has forgotten us and left us to bear our own hurdens, find out if, through the strain and tension of our lives, there is not some physical or nervous cause for

our condition.

As an readers may remem-ber, the chief object of the Commis-sioner's visit to Vancouver was the opining of the new buildings, which will form the base of operations for the work on the Pacific Coast, and in realy to a question as to what he reply to a question as to what he thought of the Army's latest acquisition, the Commissioner said:-

Instead of mailing the chairs together on a strip coming the chairs together on a strip of mood, a grooved strip is fastened on the floor, into which the back legs of the chairs are placed. This arrangement keeps them rightly in place, at the same time enabling each chair to be handled separately. This idea could be imitated with great advantage in other parts of the territory. - I commend the suggestion to my comrades. "On the second floor, to which you ascend by a very broad and nice stairway, are located the Provincial Headquarters, which consist of a rallandid funt, of rooms, affording magnificent accommodation for the Provincial Staff, also for the Immiration Staff. gration Staff.

"There is also, on this floor, a very commodious room, capable of accommodating, say a hundred and twenty persons, which will do admirably for councils and special soldiers gatherings. At the back of this is situated a beautiful sunte of airy, healthful hving rooms for the officers of the carrie.

For the Juniors.

"The third floor contains a mornid-cent Junior Hall, capable of serting approximately, three hundred Junior-together with the various class rooms required for a well-equipped Junior Work. "This is all splepdid, Commissioner,

how is the corps progressing, generally?"

Successful Corps Work.

"Very well indeed. They have had several notable cases of conversion lacely, while the attendances are excellent."

"In the press message received for the War Cry," reference was made to a probable Silver Band for Vancouver. Is that likely to come to pass?"

"Exceedingly likely, occing that while I was there, the order was definitely placed with me for a full set of the best Silver-plated Instruments. for the band of the Seniors. A silver Band at Vancouver will be an accomplished fact just as soon as the Trade Secretary can supply them. Moreover, I understand a proposal has been I understand a proposal has been made, which has met with very favorable consideration, for the instruments they now have to be handed over to the Juniors, so that it is more than likely that Vancourer, so far away in the West, will be the first Junior Corps in the territory to have a brass hand. a brass band.

The Hotel Welcome.

"What about the Hotel, sir?"
"This building, which is designated

Gore Avenue, immediately to the rear of the Auditorium, is a magnificent up-to-date structure, and has accom-modation for over a hundred people.

"The besement, which is beautifully lighted, lofty and airy, will probably be utilized for men from lumber cames and rutch places, who need a little triumning up and fixing before they take ordinary hotel accommo-dation. The basement possesses a separate entrance, with magnificent bathing and crematorium facilities. A portion of this area, absolutely separnto from the rest, is in he used as a sitting room for those who use the

"British Columnum, no doubt, is sharing in the influx of population, Commissioner, have you any facilities.

Commissioner, have you any facilities for increasing the accommodation if necessary ["

Suggested Enlargements.

"Yes, I may say that before the building was opened, Brigadier Smee-ton and Staff-Captain Cellior had sub-mitted suggestions for the enlargement of the place, and no doubt it will be mitted suggestions for the enlargement of the place, and no doubt it will be interesting to your readers to know that there are facilities for enlargement at reasonable cost. In fact, we could easily put one or two more stories on the present hotel, while the utilization of the space on the magnificent roof of the Auditorium building would enable us to accommodate quite double as many men.

"I may suy, that I think Brigadier Smeeton and Staff-Captains Colliec and Hayes, in fact, everybody who has laid anything to do with this proposition, should be congratulated, and you may, I am sure, look forward to getting splendid reports of a great work being done in this mighty city."

Splendid Collection.

The generous way in which the collection was taken up was a surprise to those present who were conparative strangers to the Army Themoney, and promises to that effect, came in in notes varying from \$5.00 to \$50.00, and considering that mone of those present, or at any rate, very few, could have been blessed with very extensive means, their splendid response to the call which so many others are apt to disregard or but undifferently heed, would mave afforded a striking lesson to their wealthier neighbors who worship God in aushioned pews.

The Brigadier said that \$25,000 was still needed to pay for the expenses the total cost or both buildings and the land, with the Home on Fairview, being estimated at \$60,000. Something like \$10,000 had been relief already through the merchants of the sity and others.

THEIGENERAL'S SECRET

EDITOR'S NOTE - This is a most interesting personal study of the General by Mr. F. A. McKenzie, a well-known London journalist, and shows how the General is able to accomplish so much as he does.

G 000

ENERAL BOOTH arrived in England yesterday, fresh from his triumplis in the Far East. Physically he is the most wonderful old man the

world has seen for centuries, and it is doubtful if history can give another example of a man hearing eighty who has done so much as he.

who has done so much as he.

He is seventy-eight years old. He
werks unceasingly, without holidayor recreation. Even when traveling
he carries his office with him. He travels more than many who make travel their business; he preaches more often than a popular evangelist; he writes and publishes as much as almost any professional author; he bears the daily burden of the man-agement of a world-wide organization. and he is ever devising new schemes. As his years increase, his activities scem to increase also.

What is the secret of this enduring strength?

Take the record of the man during

The way in which the General avranges his days so that he can accomplish so much is worth attention. The first secret of his life is simleaving every secondary detail to his assistants, and yet himself keeping a grin over the heart of his work. It you visit his personal room at the Meadquarters in Queen Victoria Street you will not find a book, a paper, a document there save those which have to do with the affair of the moment. A big, firm table, a number of maps on the walls, and an easy chair or two complete his equipment.

He lives in a little house at Hadiey Wood, a house that would be rented at no more than \$300 a year. The rooms are scantily furnished with the oid-iashioned goods that he had when ho was a young Methodist minister. Here he sleeps, when not traveling, out of the noise of London.

Up to a few years ago he started his day with a cold bath, and made a point of working for two or threa

tention to certain personal desail which would surprise some the a careful that his clothes are dry, and that he does not stand in a draught while speaking at his meetings. As assistant has traveled with him fer many years who sees to it that when he goes on to the platform the con-ditions are right, the platform in the right height. ditions are right, the platform in the right height, the rending desk in the best position, the lights so that they do not shine in his eyes, and so on. He has learned, and his people have learned, that it is the little trials and nerve strains that often take. more out of a man than the most efforts. General Booth would probably barely notice any inconvenience if he had to live for a month on dry biscuits, but he would find it hard to biscutts, but he would find it invision endure speaking with a chandeler flashing in his eyes, or sitting still in clothes damp with perspiration. From eight in the morning until

about eleven in the evening, the old General remains constantly busy, save for the brief afternoon map, Even when in train or steamer ho will not rest; and his com-panious tell how when he was once traveling through the Red Sea-where most men are limp and exhausted with the heat-he kept on at some literary work all day as though he had been at home.

Preparation of Addresse-

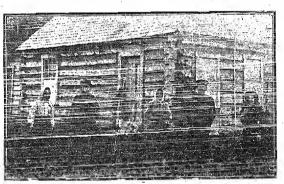

When he has an important address to give he devotes much time to it. Ho begins by writing half a dozen-headings. These he claberates, and-then, it may be a day or two after, he calls in his shorthand writer and dictates the address. He takes the typewritten copy and prunes and re-vises it, polishing up the style, salesting the words, and so on. This is re-copied, and otten again worked here and re-cobied once more. Then in the end the General goes on the nist form with his whole theme destiy in his mind. There is no need for him to look at his type-script, for he knows what he is going to say.

Part of the day is given to reading.

He will study onything that can then a light on his knowledge of man. He is a close student of history, ancient and modern. Of the two books he has from Mudie's, one will usually be a review, and the other historical, biographical, or military. Roberts's "Forty-One Years in India," Isn "Forty-One Years in India," Isn Hamilton's "Diary of a Staff Officer," and similar books appeal strongly to him. He is not a very great newspaper reader.

It is usually eleven and sometimes later before the old man goes to bed. Hed in his case does not always mean sleep. When troubles arise and diffcuities erop up, as they often must in a work so great as his, he losses about hour after hour in the darkness. about hour after hour in the darkness. An electric bell always connects him during the night with his shoftlend writer, and at times the General despairing of sleep, calls his assistant up and dictates for hour ster best when all the rest of the world is sunk in slumber.

The old General is highly errors and sensitive. Recently in a monant of self-illumination he explained how he had to do violence to all his feetmus and personal desires in user himself ever before the world. These who depict him as hardened and insensitive under the strain of his life sensitive under the strain of its av-mistake the man. Quick to more, be-is also quick to be moved. the past twelve months. Since June 1906 he has addressed about 900 indoor gatherings, and countiess meet-ings in the open-air. At each of these assemblies he has been the one outstanding figure, the centre of emotion and enthusiasm. His public addresses have averaged over one a day. Most orators think that a speech to a great assembly is in itself an exhausting day's work, only rarely to be under-

He has written and published in the year something like 200,000 words. Even while on his way home from Japan he has dictated 30,000 words of a rook.

He has traveled over 35,500 miles by land and sea, including a motor tour of 1,500 miles within the year.

Sovereigns He has Met.

He has been received by the King and Queen of Denmark, the King of Norway, the Queen of Sweden; and the Emperor of Japan. Eminent men of all kinds bave conferred with him; from Imperial statesmen to Japanese commanders. He has also had the daily supervision of his Army, the task which claims his first attention. hours before breakfest. Since he became a septuagenarian, however, the cold bath has been cut off, together with the early morning work. At half-past seven comes breakfast ten and toast, with sometimes an egg. The tea is strong, and is made half with milk. By not later than eight o'clock he is at work, writing, dictating, or interviewing.

The Simple Life.

His food is simplicity itself. Ho neither smokes nor drinks. For several years he has been a vegetarian, not as a matter of principle, but because he finds that it suite him. The mid-day meal the chief one of the day, consists of a vegetable soup, a vegetable dish, and mayoareni and chesse, or rice pi king, or a baked apple. At four o'clock comes another cup of ten, with bread and butter or a scone, and later in the evening the final meal, often nothing but bread and milk.

He elways, if possible, takes a short rest after the mid-day dinner. He has kept this up for meny years, and believes that it largely contributes to his staying power during the latter portion of the day. Dinner over, he goes to his room, and lies down quarter of an hour or twenty minutes, in the dark.

While he does not give food much thought, he devotes an amount of at-

When Jack's father died, he left him the nice sum of \$15,000. Jack's tastes were expensive and he soon made the pile fly. At length he was a duced to his last dollor and still he was not satisfied. The craving for strong drink had taken hold of him and he became a victim to its ravages.

Miserable and destitute he wandered the streets of a large city, a prey to remorse and a slave to his appetites. In this condition he wandered into an Army Shelter in Canada, and was given a change to do better. The omers found him work and did their best for him.

Prodigal Jack came to the penitent form and cried for mercy and God saved his soul. Then began the work of building up this convert and keep-ing him from the thousand and one enares that beset him on every side. Little by little he made progress, and year by year he prospered until now he declores he is one of the happiest men in the world.

Since his conversion he has got married and now hos a hoppy wife and home and six children. Thank God His blood can make the

vilest clean.

This Question Looks Easy.

The Young Convert's Bright Idea.

"Hew do you know you're saved?" asked a man once of a young fellow who had recently been to the Army penitent form and got converted.

The abrupt question rather non-

The sneering tone of his questioner quite troubled the young fellow, at I he began to think it was rather hard that people should bully him so, beforc he knew anything about the why the wherefore of selvation. Sud-

A Youthful Desperado. A Cura For Stammering.

George was only sixteen, but had gone deaply into sin, and was a slave to swearing, smoking and secret drink-

ing. Walking moodily along the street one Sunday night, going nowhere in particular, a Salvation soldier passed him. Something in the dejected attr tude of the youth struck the Salvation-ist; turning back he placed his nand on his shoulder and invited him to come to the meeting with him.
"No, I don't want to come," said

George, "I'm going to have a smoke."
"Come, just this once," pleaded the

Salvationist.

On the impulse of the moment, George yielded, and accompanied his new found friend to the little hall. He has a very vague impression of the he remembers is the text that the Captain spoke from. It burned its way into his heart. "One shall ou way into his heart. taken, the other left."

Before the meeting closed that night George was seeking mercy. The wastrel took the first step that night

towards becoming George the Salvation Army Officer. There seemed many difficulties in the way, the chief being his stammering tongue and his poor education. He felt sure God called him however, and one Sunday merning he prayed, "Lord, if You want me, take away my stummering tongue." To the astonishment of all, he never stammered again, and went forward to fight for God as a Field Officer.

She Brought the Cat.

But Wanted Salvation.

"Do you know of a good home for stray cat?" The young lady who asked the question had the cat in her orms, a poor,

lean, black animal, with its ribs al-

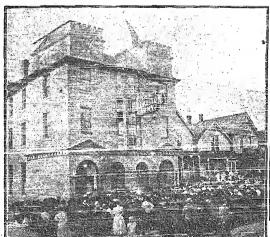

"Yes, bring it in here," said the Army officer. "Foor thing, I'll give it some milk."

Conversation followed About three weeks previously the young lady had been in the Sunday afternoon meeting, and though she did not feel her need of solvation then, she had since felt she needed to be advised on spiritual matters, ond had probably brought the cat to conceal her real purpose in calling.

The Captain felt she wanted to be spoken to about her soul, and knowing there was no time like the present, persuaded her to kneel and pray, with the result that she get converted.

The cat was kept at the quarters and now a fine, sleek animal with an hereionate purr. It is all unconafterionate purr. It is all uncon-scious of the part it played in the conversion of a soul, but it always comes in for some extra petting and stroking whenever Sister Nellic calls at the quarters.

It is interesting to learn that the Manitoba Agricultural College has arranged for a special train for the purpose of giving demonstrations in butter-making, milk testing, the operation of cream separators, etc., number of points situated in districts specially adapted for dairying. This train is known as "The Dairy Special," and has one car fitted with cream sep arators, ehurns, butter workers and Babcock milk testers.

The Commissioner Hoisting the Flag at Vancouver.

They Met Their Doom.

It Meant Salvation to Many others and Was Not so Dreadful After All.

An officer communding a certain corps in the United States, had two promising young women soldiers, whom he was convinced would make good officers. He urged them to apply for the Work, but they were unwilling to do so, though their call was clear, Now it happened that Commissioner Booth-Tucker was announced to visit the corps on a certain Sunday, and, knowing that he would interview them about their Candidateship, they mutually agreed to stick to their decision not to become officers, giving as an excuse that they were not strong enough for the work.

The Commissioner came, and knowing nothing about their condition of mind, he spoke to them obout becom-ing Candidaies. They were both firm in their refusal.

All three kneft down, and as they did so one girl whispered to the other, "We are doomed." They were, for it ended in their surrendering their will to God, and going torth in His service as offcers of the Salvation Army. They are to-day two of the most successful women officers in America, and hove led thousands of souls to the Saviour.

Glance at the World. IMPRESSIONS OF MY TRIP TO ENGLAND.

By BRIGADIER SOUTHALL.

Mrs. Brigedier Southall.

(Continued from last week.)

The Chief of the Staff.

One of the events of the trip was the privilege of being present at the Young People's Meetings in Manches-ter, led by the Chief of the Staff.

What a sight it was to see those 700 or 800 Young People—nearly all in uniform—listening eagerly to the Chief's masterly addresses. By far the majority of them were working boys and girls—the latter factory girls, and one might wonder as to their capacity for such matter as the Chief gives. It interested me to watch Now, the Chief gives a most searching enquiry into the withcring power of inward impurity, and the blank hoplessness of a future in which there is any compromise in the present. It is deep, searching, awe-inspiring truth. Do they follow? Do they comprehend? The riveted attention-the contemplative look-the sct brows, right to the back seat, give a sufficient answer. Oh, the lives that must be influenced through the mighty unction that swept again and again over that interesting audience and through the impulses of those Young People, was a thought that could not fail to thrill anything less susceptible than a stone.

And now the Chief shows the spirit-nal triumphs of those "whom the truth has made free." In their mind's eye, his audience sees ramparts scaled citadels taken, victories achieved, and faith puts in their mouths the shout of triumph, and the war song of victory. The smile on their faces and their glistening eyes speak of a confidence and hope in the days when the battle will become hotter and longer.

The interview granted me by the Chief and the meetings mentioned, constitute that Sunday as one of the red-letter days of my life.

Our own Dominion certainly figures commontly in the Old Country, and the lime-light is being thrown upon its possibilities for the future, and elready it is assigned the most prom-inent place in the Empire before many years. So strongly is this restixed, that some prephecy a larger population in half a century than the Old Country itself.

sufficient introduction, and questions are quickly plied, for it seems everyone is interested.

From a Salvation Army standpoint it is equally pronounced. The fact of Commissioner and Mrs. Coomb's being our leaders, too, has caused many eyes to be focussed on Canada, as everywhere we were burdened with enquiries, and numbers volunteered to come at a moment's notice if the reinforcementa were wanted. The Commiss sioner's kindly thought for his officers is cherished as a fond remembrance, while the restoration of Mrs. Coombs' health and lier active service was very eratifying to many.

To attempt to convey the love and Salvation greetings of the Chief of the Sinff and a host of prominent officers and others to our Commissioner and Canadian comrades would involve considerable thee and trouble, hence, must use this means of performing that pleasing duty.

We were much impressed with the extensive character of the buildings. An abundant supply of light and air is afforded the employees—numbering between 300 and 400. The buildings are one story, with a bountiful supply of windows or glass roof. The printing works show the least trace of ink, or littering papers of anything I have ever seen—in fact, there is an absence of anything of the kind on the floors, and cleanliness and order prevail everywhere. On Tuesday, evening, knowing the crowd would not be very large he returned to the: other stand, whereupon the Chief came up to him and in an insolent manner asked why he hadu't stopped over at the other open-air as he was told, and further, stated that if he did it again he would be arrested; in alderman, who had heard there was going to be trouble, stopped us on the street and told us to go ahead, and be would look after a lawyer it necessary. So we marched to the same open-six stand, and had hardly stopped when the Ensign was beckened away by a police Captain in plain clothes, and put under arrest; our friendly alder man, however, went over and inside on bailing him out because of the Ensign's wife and baby. Naturally, this outrage aroused public opinion, and censure of it was heard on all sides. The Chief threatened to arest the whole crowd the next night, and our soldiers were thoroughly aroused and prepared to go to jail; but before meeting time, the Mayor, who had been out of the city, came with the city Atterney to our hall and apole-gized to the Ensign for the incident, saying it would not have occurred it ho had been at home, and he would see it should not take place again while he was Mayor. The General's Welcome Home was celebrated on Thursday, June 27th, by a great thanksgiving meeting in the Royal Albert Hall. It was a superp demonstration. Over twelve thousand people are said to \(\) e been present. In some ways the scene was such as even the Salvation Army has not known before. Everywhere the mammoth hall was suijably bedecked in Japaness fushion, and almost everyone present wone a big golden covanthemum. But even more remarkable than the decorations was the inamonanum. "The Daily Telegraph's" report is perticularly full and instructive. Our contemporary says:-

"If the great ceremony of yesterday be any criterion, there is a new and widened life of activity opening for Oxford with the installation of Lord Curzon as the new Chancellor. Never before has the annual list of henerary dectors in the various faculties contained so many or such important names, and the vastly extended field from which the new Doctors are this year drawn promises well for the future usefulness of our senior univer-sity. The occasion was felt by every ally. The occusion was felt by every one to be of unusual interest, and long before the hour appointed for the opening of the Convocation, the great half-circles of the Sheldonian were erowded, and the floor of the theatre, reserved for graduates, was a dense mob from side to side, only a small gangway up the centre being kept clear for the various processions. "Soon after cleven o'clock, the

Chancellor, preceded as usual, by six bedels and accompanied by the Hebdomadal Councillors, Heads of Houses and others, took his place on the throne which figures prominently in the centre of Sheldon's theutre, and

S we have already in-formed our reades, the opening of this special annual con-university of Oxford memoration of the benefactors and announced with the formality the opening of this special annual commemoration of the benefactors and founders of the University. At once the list of new doctors was submitted to the domini doctores present, each name in succession being introduced a few words of culogy. The whole of the proceedings from first to last were, of course in Latin.

Undergraduates' Welcome.

"It was no ordinary list of course; never hefore have the honorary duc-tors included in one day the Lord Chancellor, the Prime Minister, the Lord Chief Justice and the Speaker. but the importance of the names lies in another matter than their official representativeness, as was well recognized by the Convocation. It would be a mistake to suppose that the undergraduates in the gallery were solely responsible for the warm but varying satisfaction expressed us the varying satisfaction expressed its die names of those whom the University was delighting to bonor were read one one by case. Bay it would be a good augury for the future generation had this been the case, for a nice discrimination was often shown, and again, and again some invaluable worker in the seclusion of his library or laboratory received a welcome that betrayed full acquaintenes with his metics. But, both at this preliminary submisof their names and afterwards as each new doctor was ied up to the space below the Chancellor's throne, the popularity of four men stood out in a most remarkable and, indeed, exma most remarkable and indeed, ex-traordinary manner. And first of these was General Booth, whose splendidly-cut head and vigorous white hair and beard, more like a major prophet than a modern reformwell set off the red and erimson of the D.C.I., robe, which hid the uni-form of the Salvation Army. His reception was uproarious, and the aged General in delight waved his

Deminion Day.

The crowds have been magnificent. At almost severy meeting of the two Sundays and Dominion Day, the spacious tent might have been filled three or four times over with the people who surged all round the canyons. As may be inagined, Salvationists and Army adherents formed the bulk of the crowds, but ministerial breatnen and church-going friends were present in considerable numbers, and freely testified to blessings received.

I was much impressed with many of the testimonies. They revealed the fact that a sout-saving work is being carried on in the Toronto corps which is as productive of temporal berefits as any phase of Army operations in any part of the world. The case the phrase of one, "This home that nine weeks ago was a held, is now a little heaven."

Another finct was also clearly brought out—the great bleening these camp meetings have been. Quite another testified that at Dufferin Grow last year they had sought and found salvation.

Clear Holiness Teaching

Clear Holiness Teaching

The testimonies revealed another cory significant bentue or brivationism in Canada. It is the clear-cut, definite atotements to possession of the bicssing of a clean heart. Judging by the testimonies I have heard I should say that Canadian Salvationists have very clear ideas as to the doctrine of holiness, and monifestly a very deep realization of its effects in their own experiences.

But oil things considered, this is not suprising, for in no land have I listened to greater clarity of indiness teaching, or witnessed mors stremuous endeavors to bring men ond women into a state of sanctification than in the Land of the Maple Leaf.

The former was noticeably so in the case of the Countmissioner's Bible readings at the teamp meetings. I

Naval Leaguers Look In.

We have been visited at Victoria by Brigadiers Smeeton and Howell, Staff-Captain Jost, Adjutant T. Bloss, Captain and Mrs. Johnstone and Lieutenant Wright. We thank them for their help and co-operation. Δ number of souls have been saved lately, amongst them being a prisoner at the jail, and a brother who had been a soldier for sixteen years, but, through negligence in prayer, had left his God-given post some asven nonths ago in Montreal.

While H. M. S. "Monmouth" was

lying off Esquimault, waiting to take Prince Fushimi back to Japan, we had the pleasure of a visit from Leaguer Howard and Brother Harwood. Captains Traviss and Richard visited our comrades on board the ship and there met Leaguer Downing. God is keeping our comrades we'll saved, and they are anxious for the salvation of their shipmates.—Le Roi.

VISITORS A GREAT HELP.

Fine Meeting at Hartland.

Our Young Teople's Campaign has started well at Woodstock, N.B. Son-day was a blessed day. The afternoon meeting was given over to the Juniors and they did well. Two comrades from Fredericton were with us for the day-Sergt.-Major Logan and Secre-Lyons. They were a creat help and blessing to us; the latter playing first tenor in the band. On the 1st July we went to Hartlend, where a big meeting was held at night, with forty-one seldiers on the moreh. The Church was crowded to the doors and many stood outside, unable to get in. A beautiful time was spent and a good work done. Ensign Martin and Capt. Porter are leading us on well,-Band-

THREE AT THE DRUM-HEAD.

Four More Surrender on Sunday.

We have had a splendid week at arliament Street. On Wednesday Parliament Street. On Wednesday night one soul knelt at the drum-head and two more came on Saturday. On Sunday night four came to the Mercy Seat. One brother gave up his pipe and tebacco, another left the meeting under deep conviction but afterwards came back and gave himself to God.

The soldiers are turning out well, fighting hard and believing for many more souls. On Friday night, Captain. Church conducted a Bible reading, which was helpful to all present.—
J. H. S., for Captain Patrick and Lieutenant McLean.

DEALT FAITHFULLY WITH NEW-COMERS.

We are still going ahead at Cobourg. A number of strongers came to our meetings last week, and we took the opportunity of dealing with them about their souls with the result that are surrendered to God.—Sunbeam. SEVENTEEN BECRUITS EN-ROLLED.

The Bandmaster Gets Married.

Since Staff-Capt. and Mrs. Coombs have taken charge at Caigary we have had some wonderful times of blessing and many conversions have taken place. On Sunday night seventeen recruits were curolled under the Flag, and promised to be faithful soldiers of the Army. A farewell ten was held of the Army. A forewelt to was held on Monday for several comrades who are leaving us. On Wednesday, a wedding took place, when Bandmaster S. Robinson and Sister Georgina Capoland were united. The groun was supported by Wm. Leeke, and Miss Jessie Arom acted as bridesmaid; the caremony was performed by Staff-Captain Coombs.—May Jackson.

THE LIGHT BRIGADE CHARGES.

Two Rabels Surrender.

The meetings at Brantford were led ell day on Sunday by Captain Lowrie, assisted by the light infantry. Our heavy artillery was bombarding Humilten for the week-end, assisting the D. G., and exhibiting the splendid Army-made Band instruments.

We had a splendid free-and-easy in the afternoon, when several testified to the saving and keeping power of God, in a bright, helpful and instruc-tive manner. A powerful meeting war held at night, and two sinners surrendered to God.-Observer.

The meetings were conducted by S. M. Wilcox and Treasurer Brown.—John.

PLAYS IN THE PARKS.

The Owen Sound Band is getting along well. Three new arrivals make their total number of players eighteen now. During the summer months they are playing in the parks and on a recent Sunday efternoon, over 500 people listened to the music.

They went to Woodford one Friday, and gave a musical meeting in the

We rejoiced over two souls at Moncton last Sunday. They were both backsilders. God is giving us wonder-ful times here and our crowds and collections are good. Under the leadership of Bandmaster Smith, our. Band is doing well. Captain Hamilton and Lieutenant Richards are much loved by the townspeople. HE TOOK A BOLD STAND.

Sells Crys and Testifies Clearly.

We had splendid open-air meetings at Wingham during raco week. They often lasted till after ten o'clock at night. Three Sisters were recently enrolled. Captain Matier's visit was much enjoyed, and a young man who surrendered all in his meetings has since taken his stand well, and is now a "War Cry" boomer and testi-fies clearly at both indoor and open-

air meetings. We are delighted.

Last Sunday the meetings were led by the Band. Bandsman Clarridge read the lesson at night and faithfully with the people till one poor drunken backslider returned to the fold. Our soldiers are all united in love and mean to do their best to extend God's kingdom.—Fred. Calvert, for Eusign Banks.

Hold Thirteen Meetings During Yes.

Sergi.-Major Heard, of Doversound, assisted by Brothers Watters, Est and Moore, spent the last weekend with us at Newmarket. Their muse drew large crowds, and the concern which they gave in the Barracks on Saturday night was much appreciated. Thirteen meetings were held duting their stay, and we believe much good was done for the Kingdom, Captain Tiller was also with us, and he gave a beautiful Lontern Service, mained Ben Hur," which was cujoyed by ali.-Mrs. Captain Drews.

TWO OLD WARRIORS. :

He says:

"With a nature that has ever shrunk from publicity, I have made myself a gazing stock in the eyes of the world. With a sensitive rpirit, intensely alive in every part to ridicule, I have been petted and pierced with every chaft of mockery that men could invent, and followed by every conceivable form of slander and calcumny. Physically deliente and very unequel to exhaustive labor, I have toiled on, night and day, with little cessation, from the bour the Flag was first unfuried to the present. "At Teboxa we have a splendid site, right in the midet of the native country, although within convenient reach of King Williamstown. The Chief, or Headman, of the Location has promised to get his people to assist in making and burning the bricks, so we sholl be able to keep down expenses to the lowest possible point. The people theuselves are all very anxious that we should begin. "It may be interesting to note hera that Teboxo, the proposed site of the Training Institution, was, when we first commenced operations there, a purely heathen Location. "A woman was recently released from the prison here in Kingston who had served a twelve months' term. She expressed a desire to go to the Army Home, and the authorities accordingly handed her over. On the Saturday following, the man with whom this girl had been living for five yeare previously, came down to Kingston with the intention of claiming her. This was at first relused; but on Sunday night, of a meeting conducted by the Colonel and Mrs. Jindsay, in the Kingston Men's Shelter, he nofessed conversion. We investigated the case, and tound that he was a first-class blucksmith, in receipt of good wages, and was really anchous to make the women his wife, while she oppeared to fully reciprocate his affection. It was therefore arranged at once that they should be married, and in the pressure of Colonel and Mrs. Lindsay, at the first was the fact that it being Bank Holiday the Control of the control."

Army Veterans Testify—Corps Visita Sick Comrade—Meeting at the Jail—Man Walks Ten Miles to Get Saved.

God gave us a very happy week-end'a Sort gave us a very nappy week-and service for Him with the London I. braves. Already, Saturday night, His Hallowed Presence broaded o'er our meeting, preparing our hearts. A special fecture was the testimony of a goodly number of Army veterang who have spent twenty-five years lighting for the King. They oll agreed the the way was growing brighter still.

After Sunday morning's coben-old outside the hotels, we marched to the home of a dear comrade, who seemed already to have entered the swellings arrany to have entered the sweinings of Jordan. Proposed up by pillows, he was wheeled to the window from whonce he could look out again upon the dear trees of comrades with whom he has labored faithfully for many years. The Band boys put their whole souls into the stroins of "Lead kindly. light," and Adjutant Habkirk once re committed him to God. The incident lent its own influence to the precious holiness meeting which fol-

It was the Army's turn to visit the Juil. The League of Mercy members greatly value this opportunity. Am-ougst the prisoners were three mera lads—one, a poor Indian, has yet to stand trial for murder. Fully half raised their hands to indicate their desire for our prayers. Each had a War Cry presented to him. We were glad to learn that the women's side was vacant.

The Senior corps spent Sunday, afterneon surrounded by hundreds of people in the park. At night, in spite of the heat, a good crowd thronged the borracks. God's Spirit aroused many. Our man was so under con-viction of sin that he said he had walked ten miles on purpose to get saved at this meeting.

Tireo captures were secured—one being a former officer, who had for-saken his post. Their testimonics were clear and definite.—Mojor Simco.

The week-end meetings at London II. were well-attended. Datch conrades taking hold in good shape—hold singing and speaking. Some old-time Primitives are also getting worned up and enjoying themselves. On Sanday, night two backsliders returned homes. For years they have been wandering away from Father's care, but that is now happily ended. It was an impressive sight on the green sward, as the two knelt at the chair; the public drew a little nearer as they watched the struggle for liberty. Hallelujah l Jesus came. May this be the nucleus of a mighty awakening over the river. -Crichton.

Diamond Cutting in Holland.

Women's Skill in Cutting Precious Stones Give Them Preference Over Male Workmen.

Policied With Dust.

The Kimberley Diamond Mines.

HE following graphic account of the diagnound entiting industry at Annaberdam, is interesting:

"Among the many industries of Amelerdam, that of diamond entiting has long been an important one. Since the filteenth century, when it was sturted, it has been extensively extracted on and to-day, no fewer than early firms are registered in Amsterdam as diamond autiling or polishing companies. Some of the firms restrict themselves entirely to one process, that of diamond polishing, while others earry out the whole of the three processes, diamond splitting, diamond cutting and diamond polishing. In one of these typical complete factories ninely per cent, of all the many thousands of rough uncut diamonds received every year, come from South Africa, and those principally from the De Beers mines at Kimberley. It gives one a little idea of the importance of this industry in Amsterdam to realize that 450,000 diamonds were cus and polished in a single factories in the company of the process.

Splitting Process.

Splitting Process.

The first of the three processes through which the rough, uncut diamond has to pass, is that of splitting the stone. Men are employed at this work, which is all done by hand without the sid of machinery. It is not a lengthy process, unless the stone contains a great many thus, for an ordinary diamond, weighing about ten carate, can generally be split in fifteen minutes. The object is to divide the rough, uncut diamond (containing flawe) into several pure, flawless stones, and in order to do titis, strong pressure is exerted on the weak spots (caused by flaws) by means of a diamond-tipped tool, which is held in the right hand. It is ent off and well-recognized principal that nothing but a diamond will cut a diamond. In the left hand is held a curiously-shaped little frame; into which the rough, diamond to be split has been firmly waxed.

Great pressure is then used on the

Great pressure is then used on the weak spet, and in a few moments the diamond splits into two portions. Should there be any more flaws in either of these sections the process is repeated until several pure flawless diamonds lie on the rough, wooden tables of the workersen, ready now tor the second process, that of cutting. This process, like the first, is almost entirely performed by hand, but with one striking difference—the work is by woman and girls instead of men. Only on the case of very hard, difficult stones is machinery accessary, and then a more rian is employed to use it.

use it.

The work of diamond outing is a delicate and difficult task, very trying to the eyes, too, for some of the diamonds are so minute that four hundred of them or more may weigh only haif a carat. Each worker is responsible for the packet of diamonds she receives at intervals from the forewomen, and, if by accident she loses

one of the precious stones, she has either to find it again or refund the its value.

The Cutting Operation.

The Cutting Operation.

The tools employed in diamond-cutting are very similar in appearance to those employed in the nest process, that of diamond-splitting. In both cases diamonds are used as knives, after hearing been firming waxed into the tip of pearabapes tools. The women hold in the left hand the diamond they wish to cut, which has also been firming waxed into a wooden frame. Little jets of gas are always been firming on the various tables, ready to be used at any momens when melted wax is necessary.

The only real difference in the two processes of diamond-splitting and diamond-cutting lies in the finet that whereas the men who split the diamonds use pressure on one spet only where the fine spend their energies in rounding the whole shows and carrefully cutting off all angles to be seen on its surface by means of the sharp diamonds they hold in their right hands. Occasionally the service of time, but an ordinary shore weight hours. When the diamond has been sufficiently out and formed this increased whole day's work—a day of eight hours. When the diamond has been sufficiently out and rounded it is then ready for the third and last process, that of polishing. This work requires a great deal of time and is performed entirely by machinery, a luge steam-engine supplying the motive power for all theroon disks.

ron disks. The process of diamond-polishing consists in giving to the rounded diamonds, what are termed in technical language, their necessary "sides." All diamonds are divided into two classes, "brilliants" and "roses," although the only real difference between them lies in the number of "aides" they individually prosess after having been polished in one of the many diamond factories.

"brilliant" is pointed at both ends, while a "rose" diamond has one end fluttened and the other pointed. When the diamond is roady to be polished it has to be first soldered into a preparation of oil and diamond dust before being fastened (with three others) into a strong frame placed in done proximity to an iron wheel. This little disk is iron wheel. This little disk is iron wheel. This little disk is iron wheel, the produced in the ground floor, and the wheel immediately turns at the rate of 2,000 revolutions to the minute. As it revolves, the four diamonds set in the adjacent frame are gradually polished by means of the friction produced on their surface by the particles of diamond dust in the oil into which they have been dipped.

Only one partion of a diamond can be polished at once and consequently when this part has been dealt with, the stone has to be re-soldered, so that another portion of its surface may be subjected to the friction of the wheel. This process of re-soldering takes place about twenty times in the case of every "brilliant" before it can be considered to be thoroughly polished and to have acquired all the fitty-eight "sides." The "rose" diamond, with its smaller complement of twenty-four "sides," needs to be rosoldered only about six times.

Many clobrated diamonds have been cut and polished in the factory described, among them the "victoria," weighing four hundred corate, the "Magul," 279 caratis, and the "Regent of France," now in the Louvre. The great "Kohinoor" dismond we recourse than doubled.

For several months a few Cadets Save been carrying on the Salvation war in this pretty suburb of Toronto, and in spite of many difficulties, progress has been made and converts won to Christ. The only place they could secure for meetings however, was a room at the top of three flights of stairs, and so as soon as it was practicable, a site was secured and a buildsteame, a site was secured and a build-ing of our own erected. In the short space of ten days, Lieut. Denatdson and his assistants put up a pretty Little wooden hall with senting accommodation for about one hundred and tifty people, and on June 6th it was ready for occupation. On that date, therefore, Adjt. McElheney marched in with band playing and colors flying, and formally took possession in the name of the King of Kings. Much interest was aroused in the streets by the stirring strains of music and the thrilling testimenics of Salvation warriors. Some selections were played with great precision, and carboin solo parts very well rendered. I should like to have heard them play some of the ground old tunes which give such opportunity for rolling, pealing, organish musical effects.

During the week-nights, excellently attended meetings were conducted by fieur. Coloneis Gaskin and Pagmire, and Brigadiers Southall, Howell and Taylor. The spiritual results in each case were good.

Long Service Locals Receive Badges .-Three Circus Men Saved-New Building Scheme On.

Staff-Captain and Mrs. McAmmond of Montreat I. have been granted a well-earned vest, and Ensing Briston is carying on the corps work during their absence.

Brigadier Hargrave led a special meeting on Thursday night and presented several long-service badges to local officers, among them being Bandsman Guichouse, who has not in iwenty years' unbroken service.
Under the leadership of Adjutant

and Mrs. Allen, things are a-boiling at No. !!. Captain Forbes, of P. H. Q. assisted at the Sunday meetings, and reports good progress.

In the absence of Adjutant Cabrit

from No. 111., Captuins Webber and Majsey are carrying on the work. In Sunday three men who had been traveling with a circus here professed salvation and promised to throw up the business as seen as their contract expired. Captuin Webber fields it difficult to till the Administ's place as regards the French language, but she does very well for a Canadian girl.

The officers and soldiers of No IV. are getting desperately in earnest over obtaining a building of their own before the cold weather sets in again, and new plans are developing. new bandsmen have just arrived from England.

Captain Richards and Lieutenant Thornton have taken charge at No. V. and are doing a good work. Three souis crowned their first work-and efforte. Brigadier Hargrave and Ens. Bristow led the meetings last Sunday.

The Central Prison.

Lieut-Colonel Pugmire, accompanied by Staff-Captain Fraser, Captain Mo-Fetrick and the Liegar Street Band, conducted a powerful service on Sunday afternoon at the above institution.

There were three hundred prisoners present. The Band rendered several selections, much to the delight of the men present; while Captain McFet-rick melted some to lears by the recital of his life while in the service of ain, and how he was brought to repentance and to God.

A Cottage Prayer Meeting.

A Short Sketch of a Very Ordinary Mode of Salvation Warfare.

T was a pouring wet night, and very few peo-ple ventured out excent on the most urgent business.

That particular night, however, was the one chosen by the Captain of the little corps to hold a cottage prayer meeting in the home of a saved drunkand, who had come of a saved drinkard, who had com-under the influence of the Army. There were not many who came, but all who did, had braved the elements and come fully expecting showers of blessing in their souls.

Filled with an earnest purpose, the Captain did her best to make the meeting as heplful and interesting as possible, and encouraged each soldier present to take the opportunity to testify, which is a striking feature of Army meetings everywhere, whether great or small. They tose to the occasion, and one after another got up and related how the Spirit of God took hold of them through the sound of the Army drum, the sight of the Sing or the hearing of a testimony in

he open-air.

The youngest convert stood up to speak, and all eyes were fixed on him. He was a young fellow and had not gone far on the highway of pleasure and sin, but was stopped on the threshold. What had arrested this youth, and turned his whole thoughts and affections towards higher and better things than wouldly pleasures and fleshly delights? Let him tell

Lis own story.
"Triends," he said. "I had no desire to be religious when I came to this country. I was intent only on making money and having a good time, but my friend here was a Salvationist. and he persuaded me to go down to the meeting one night. A comrade came and spoke to me about my soul and I began to think for myseli about where I should spend Eternity. After going a few more times, I finally surrendered to Christ, and got converted at the Army penitent form. My chum, here, wanted me to go to the open-air next night, but I didn't like the idea, and hung back for a long while. One day I slepped into the ring and ventured to give a testi-mony. I got such a blessing through mony. I got such a blessing through it that it encouraged me to do so next time, and now I wouldn't stay away thing. It is getting better all the time and I intend to go on and follow Christ all the way."

It was a quiet testimony and similar to many thousands of others, but it was powerful and convincing, from the fact that it was the speaker's own beartfelt experience, and the little company showed their appreciation of the simple words spoken, by fervont Amens and Hallelujahs, at intervals. Then they all heartily joined in singing an Army chorus, accompanied by hand-clapping:

Purther on, the way grows brighter, Count the mile-stones one by one; sous will desert you mever, It is better further on.

The bright song echoed throughout the house, as the optimistic soldiers of Salvation sang it again and again,

with ever increasing enthusiasm. In the room upstairs, was an un-saved family, and the owner of the house requested that prayers might be offered for their salvation. Then

all dropped on their knees, and one after another, poured out the desires or their hearts to God, beseeching Him for strength to resist temptation in their own lives, asking His bless-ing on all their doings and pleading for the sinners and backsliders

The little meeting was drawn to a close by air singing, with hands up-lifted, "I'll be true, Lord, to Thee." and all arose ref. eshed and strength-ened by their season of united praise and prayer. The responsibility Salvation soldier does not cense when the meeting is over, however, and several of the more earnest souls gathered around those whom they had observed to be suffering from some severe trial or lemptation, and tried to cheer and encourage them. Others urged their unconverted friends to get right with God there and then. and so an after meeting for the auxious and troubled come about in as informal a way as possible. Friendly greetings were exchanged, onquiries made as to comrades, and finally all dispersed in their different directions, to face again the difficulties of a hard work-a-day life, with their courage and faith renewed through comingling with kindred spirits, a receiving the blessing of their God.

A Great Work in the East, The Kandy Campaign,

Colonel Jane Shigh, the Resident Indian Secretary, has just concluded an important twelve days' tour of inspection and meetings in the South Indian Territory. The Colonel states that the result of his inspection is very gratifying indeed. Everything is on the npward move and there is without question, a genuine spirit of re-

vival amongst the work of the Army.
Colonel Nurani and her staff are fully alive to the opportunity, and in addition to riding in upon this wave of glorious spiritual uwakening, everything possible is being done to con-solidate the Army's spiritual and humanitarian work and so ensure its permanency. The Colonel adds that one of the most pleasing and encouraging aspects of the poor people is seen in the readiness with which they place their land at the disposal of the Army, and moreover, with their own hands erect barracks which answer the double purpose of school houses

and halls for meetings. Brigadier Cooke has had a wonderful campaign in the Jalina District resulting in 140 souls for pardon and salvation. Ten new soldiers were sworn in at Jaffine Tewn corps, and a wonderful impetus was given to the work in the district

Kandy bas just concluded a soulsaving campaign with the following results:-90 couls won, 47 new soldiers and recruits added to the rolls, and 23 new Juniors. During the voyindia, the infant child of Dr. and Mrs. Muniford died and was buried of see. Much sympathy is felt for the be-reaved parents,

Prophot of Fire.

"The Morning Leader" draws a picture which is warm and sympathetic, It says :-

The Arrival of General Booth was the signal for a tremendous outburst of cheering. The old man, with his shaggy white hair and his commanding guit, waved his hand with boyish joy in response to the wild, boyish welcome which greeted him. He seemed to soar above the rest as he strode up to the throne with the trademark of his strenuous profession, 'Blood and Fire,' blazing across his Blood and Fire, blazing across his breast. For he had fluig his robe well-back, so that all could see the stamp of hig life work, which he says will be found on his heart when he is dead.

"There was no chaffing this grand old man of the Red Banner. Even the wildest-tongued undergraduates tuned their music to a proper appreciation of the General. It was not until the new doctors of literature filed in that the battery of genial fun was let loose."

From "The Daily News" we give the Chancellor's description of the General, as Lord Curren expressed it, in Latin, on welcoming our

"When the aged General mounted the dias to get a grip of the Chancelthe dias to get a grip of the Chancel-lor's hand, the assembly rose in whole-hearted cubrusiush. A tremer of emotion passed over the white-haired old man as he acknowledged the lusty cheers which proceeded from every part of the packed inviding. The Chancellor addressed him as 'Most Venerable Six against the Most Venerable Sir, passionate adve-cate of the drops of the people, the submerged tenth, Leader and General

of the Salvation Army."

"A perfect roar punctuated this deseription, and there were shouts

'England's grandest old man!'
Thank God for the General!

A Norse Anchor Found

A Norse anchor has been found as Crookston, six neet below the soil, although how it came to be there canthough now it came to be an element be satisfactorily explained. Is was lying in clay, which epparently had not been disturbed for conturnes, and the discovery will be earefully followed up with the hope that other relies may be unearthed. The ancher will be sent to the Swithsonian Institute. It is thought the anchor may be a relie of a little hand of Nonsemon whom Left Erikson left at the coast be a relie of a liftle nend of Noisemon whom Loif Erikson left at the coast of North America centures ago, the presumption being that at that time the Red River Valley was a portion to Lake Winnipes, making navigation from the Atlantic to Debota possible.

Slaff-Captoin Robert Bell, England, tells a story which is of interest to all engaged in Salvation work. What is a sounger brother, who was corned Churchman, was impressed by the fact of his wawwant breather's consistent and began to feel in oath meet of a change of the tell in oath meet of a change of the tell in oath meet of a change of the progress, the prayer meeting was in progress, the prayer meeting was in progress, the young man ventured fissite, and nimitedly found his tare to the Mercy Scat. The Salvationists never saw him again, and doubless put bin down as a follow. But this was far from the truth. The young man went to a training college, passed through successfully, and is to-day a popular and hard-working elergyman in Negs foundland,
